RESEARCH | UNIVERSITY OF OTAGO

 Riddet Institute
ADVANCING FRONTIERS IN FOOD SCIENCE

A vibrant and successful partnership

Food – the Global Challenge of our Time

Riddet Institute Vision:

Future Foods in Harmony with Nature:

To provide the fundamental underpinning science to support tomorrow's innovations in advanced foods.

These foods will be **sustainable**, support optimal nutrition, **human health** and well-being, and appeal to the preferences of tomorrow's **global consumers**

Supporting Māori aspirations

***Our journey: to be a trusted partner
with a shared vision of a sustainable and equitable future***

Today - new relationships; Tomorrow - deeper partnerships

- Continue to align our science plan with the Māori concept of Te Taiao
- Build our cultural competency for engaging with Māori organisations, business entities and iwi
- Support our researchers to understand the value of Te Ao Māori and the mātauranga-science interface

Te Ohu Rangahau Kai

A collaborative community of food researchers
